

Aaron power develops solar container business

Overview

Today I have with me Angelo Campus, CEO and founder of Boxpwr.io, a company that is helping to bring renewable energy to where it is most needed. They are building solar power systems that fit into standardized shipping containers that can be delivered anywhere. Together, Aaron and Tom patented their direct-DC approach to EV charging via solar energy in 2018, and Paired Power has been a leading innovator in the space ever since. Tom McCalmont is CEO and cofounder of Paired Power, specializing in resilient solar microgrid charging solutions for EVs and EV. For Angelo Campus '16 and Aaron Schwartz '17, CEO and COO of the renewable-energy startup BoxPower, the latest attraction in their Nevada City, Calif., warehouse is a massive solar array, 38 feet wide by 28 feet high, mounted atop a 20-foot-long shipping container. "You can't miss it," Schwartz. Today I have with me Angelo Campus, CEO and founder of Boxpwr.io, a company that is helping to bring renewable energy to where it is most needed. They are building solar power systems that fit into standardized shipping containers that can be delivered anywhere. They got their start by bringing. BoxPower offers turnkey solar microgrid solutions for off-grid and grid-tied applications. We specialize in project development, system design and engineering, installation, monitoring and reporting, and operations and maintenance for integrated solar, battery, and backup generator systems. BoxPower provides innovative infrastructural solutions to off-grid and under-served markets worldwide. Our first product is a hybrid microgrid self-contained in a 20 ft. shipping container, which can be easily and affordably transported nearly anywhere in the world to provide reliable electricity. BoxPower's team has extensive microgrid development, production, and project management experience at Sunrun, Ameresco, Southern California Edison, Sierra Solar, and Plan It Solar. The team has collectively more than 100 years of microgrid experience and have managed and installed more than 6 MW of.
