

# **Electric vehicle energy lithium solar container shipments in the first quarter**

## Overview

---

For utility-scale and C&I projects, the top five manufacturers shipping the most in the first quarter were CATL, EVE Energy, REPT BATTERO, Hithium, and BYD. CATL shipped more than 13 GWh, while the rest shipped 2-5 GWh. The rapid global adoption of electric vehicles (EVs), lithium-ion batteries, and Battery Energy Storage Systems (BESS) has led to significant advancements in maritime transport regulations and best practices. This report details the critical updates within the International Maritime Organization. In recent research, I lay out two potential ways to do this: using onboard battery packs and charging at ports, or connecting container ships to dedicated battery vessels. How can batteries best help move cargo?

Electrification is worthwhile as a way to cut emissions and potentially save money. The world shipped 38.82 GWh of energy-storage cells in the first quarter this year, with utility-scale and C&I projects accounting for 34.75 GWh and small-scale (including telecom projects, hereafter as small-scale) projects 4.07 GWh, according to Global Lithium-Ion Battery Supply Chain Database of. As demand for Electric Vehicles (EVs) rises, shipping them in containers requires careful risk assessment due to the hazards of Lithium-Ion batteries. Additional safety measures, including inspections, stowage protocols, and crew training, are recommended to mitigate risks like thermal runaway and. Recently, battery enterprises such as CATL, EVE Energy and GOTION HIGH-TECH have successively disclosed their financial reports for the first quarter of 2025. Data shows that the revenue and net profit of many battery enterprises have increased in the first quarter, and their overall performance. robust demand for lithium-ion batteries (LiBs). Data shows that in 2023, the total shipment data by the International Energy Agency. . Global Energy Crisis; All topics. Countries and thousands of battery storage projects. EVs account 2023, the largest year-on-year gain on record. Growth is set.

## Electric vehicle energy lithium solar container shipments in the first

### The Complete Guide to Lithium Battery and New Energy shipping

The rising global demand for new energy products has significantly increased the volume of battery and solar panel shipments--making efficient and compliant logistics more critical than ever.

### Requirements for Shipping Lithium Batteries 2025

The maritime industry is witnessing a significant shift in cargo composition, with lithium-ion batteries and their applications (EVs, BESS) becoming increasingly prevalent.

#### Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

### Exploring the cost and emissions impacts, feasibility and

This study demonstrates that retrofitting to battery electric vessels has economic potential and could significantly accelerate GHG emission reductions.

### Carriage of Electric Vehicles (EVs) in Containers

Shipping EVs in containers will require particular attention to the inherent risks of Lithium Ion (Li-ion) batteries and those due to the onboard stowage location and proximity of other cargo ...

### Global lithium battery energy storage shipments

MUNICH, June 25, 2024 /PRNewswire/ -- EVE Energy, a leading global lithium-ion battery company, has sprinted to second place in the 1Q24 Energy-storage cell shipment ranking

### Surge in New Energy Vehicles Drives Battery Shipments Up; CATL, ...

Some insiders said that the stable performance of Chinese battery enterprises in the first quarter was mainly attributed to the increase in product shipments and the manifestation of the ...

### Electric container ships won't work--but a fleet of auxiliary battery

Shipping moves 90% of global trade and produces nearly 3% of global emissions. The sector has proved challenging to clean up, as cargo ships can travel for weeks between ports and ...

## 2025 Q1 Global Energy Storage Cell Shipments: CATL Leads, ...

The Q1 2025 data highlights a dynamic energy storage market, with CATL leading while competitors intensify their rivalry in both large-scale and portable segments.

## The Emerging Challenge of Electric Vehicle Transport ...

In conclusion, the transportation of electric vehicles (EVs) and their lithium-ion batteries poses new and significant challenges for the maritime industry. The ...

1075KWHH ESS

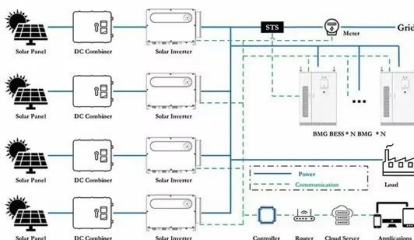

## The Emerging Challenge of Electric Vehicle Transport at Sea: ...

In conclusion, the transportation of electric vehicles (EVs) and their lithium-ion batteries poses new and significant challenges for the maritime industry. The incidents such as the Felicity Ace fire serve as ...

## 1Q24 Energy-storage cell shipment ranking: CATL retained lead; EVE

Manufacturers shipping the most in the first quarter were CATL, EVE Energy, REPT BATTERO, BYD, and Hithium. With bulk orders from major clients, EVE Energy topped REPT ...
