Muscat: Oman has signed a milestone agreement to develop its first large-scale solar power and battery storage facility, marking a decisive step in the Sultanate's renewable energy transition and long-term sustainability agenda.

The deal was finalised by Nama Power and Water Procurement Company.

Enter the Muscat shared energy storage site – Oman's answer to this energy seesaw. This 500MW facility isn't just another battery farm; it's like a giant power bank where businesses can "rent" storage space, preventing energy waste equivalent to powering 150,000 homes annually [1]. [pdf] A single.

Muscat – Nama Power and Water Procurement (PWP) signed an agreement on Monday with a consortium led by Masdar to develop Oman's first utility-scale solar and battery storage project with an investment of RO115mn. The Ibri III Solar Independent Power Project will combine a 500MW photovoltaic plant.

While lithium-ion batteries powered the first wave of solar and wind adoption, 2024's 32% surge in global renewable capacity has exposed their fatal flaws.

Enter Muscat's sodium-ion technology – the first viable alternative that actually makes grid-scale storage affordable. But why should you care?
