## Overview

---

With the containerized solar cold rooms Odimer, you can store your products anywhere, 24/24. Containerized cold rooms that run on solar energy make it possible to solve cold storage problems in areas without an electrical network. Off-Grid Solar Containers transforms 20-foot shipping containers into complete, turnkey electricity generators—engineered for the places where conventional infrastructure can't reach, and built for those who refuse to compromise on reliability. Born from years of solar expertise at Danger Electric. LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar. We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. SolaraBox Mobile Solar Container brings green energy wherever you need it. The integrated solar system delivers 400–670 kWh of energy daily. Thanks to foldable solar arrays, the container is rapidly deployable — operating within hours to support power needs across diverse scenarios. Built for. Our foldable solar containers combine advanced photovoltaic technology with modular container design, delivering rapid-deployment, off-grid renewable energy with industry-leading efficiency. Transportable via standard shipping container, the system achieves full operational capability within 4-6.
