

# **The solar container industry will issue a national subsidy policy**

## Overview

---

The U.S. solar industry is facing major policy changes in April 2025. The Trump Administration has enforced new tariffs, the EPA is rolling back climate initiatives, and Congress is debating the future of clean energy tax credits.

WASHINGTON — In line with President Donald J. Trump's Energy Dominance agenda, the Department of the Interior is ending preferential treatment for unreliable, subsidy-dependent wind and solar energy. The move follows the signing of Executive Order 14315, Ending Market Distorting Subsidies for. Regardless of technology or size, every facet of the solar industry is affected by local, state and federal policy. SEIA is engaged with policymakers at the regulatory and legislative levels in Washington, D.C. and across the country to establish supportive policy frameworks that allow solar to.

Solar policy - The U.S. solar industry entered September with a wave of major policy developments at the federal and state levels. From revised federal guidance on the Investment Tax Credit (ITC) to state battles over net metering and renewable standards, these updates will shape the trajectory of. As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a potential policy storm. The confluence of an uncertain future for the Inflation Reduction Act (IRA), escalating import tariffs and evolving state-level responses threaten. Compared to the IRA, the OBBBA introduces substantial revisions to the eligibility criteria for PV tax credits by shifting the key qualification date from "beginning of construction" (BOC) to "placed in service" (PIS). Furthermore, tax credits for Section 25D applicable to residential PV. The U.S. solar industry is facing major policy changes in April 2025. The Trump Administration has enforced new tariffs, the EPA is rolling back climate initiatives, and Congress is debating the future of clean energy tax credits. These changes will significantly impact solar developers.
