Harvest and Population Trends

Population Statistics & Trends Fawn to doe ratios and yearling buck percentages are used to help estimate the deer herd size annually and is the starting point for setting antlerless harvest quotas.

Lake Sampling Procedures - LTT Water Quality

The primary objective of Long Term Trend (LTT) Lakes monitoring is to document long-term trends in lake water chemistry. This data set also provides context for water chemistry in other lakes in terms ...

Trends in electronics disposal at Wisconsin solid waste facilities

These trends, however, must be viewed through a larger lens. If low cost or free and convenient recycling options are truly the key (or even a key) to the decrease in electronics arriving at solid ...

Wisconsin DNR AIS Research Projects

Eurasian watermilfoil: long-term trends in unmanaged populations The Wisconsin Department of Natural Resources conducts and supports a variety of projects that improve our

understanding of aquatic ...

 LFP 48V 100Ah

Deer Statistics

CWD was first detected in Wisconsin in 2002 when three deer taken by hunters in the fall of 2001 near the village of Mount Horeb, about 10 miles southwest of Madison, tested positive. Since that time an ...
