You consent to Dun & Bradstreet (D&B) using this data for marketing and analytical purposes, and to D&B emailing you or using an autodialer or pre-recorded voice to text or call you at the number you provide with marketing or other offers. Consent is not a requirement of purchase. See our Privacy. Deep technology (deep tech[a]) is a classification of organization, or more typically startup company, [1] with the expressed objective of providing technology solutions based on substantial scientific or engineering challenges. [1] They present challenges requiring lengthy research and. The objective of this paper is to integrate and synthesize the criteria for categorizing deep-tech ventures, given the considerable hype that has beset the use of this term in recent years and the proliferation of approaches to its delineation. This is especially important today given the risks of. Deep tech or deep technology refers to a class of startup businesses that develop new offerings based on tangible engineering innovation or scientific discoveries and advances. Usually, such startups operate on, but are not limited to, agriculture, life sciences, chemistry, aerospace and green. Swati Chaturvedi is cited as being the originator of the phrase and the concept of 'deep tech'. She coined the phrase when looking for a way to differentiate and characterise startups in the life sciences, energy, clean technology, computer sciences, materials, and chemicals from other, more.
